

Joorie Khalid Alsakran

AI Engineer & Software Developer

Riyadh, Saudi Arabia | +966 50 149 7394 | joriealsakran@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Computer Science graduate (Honors) and AI Engineering graduate, currently advancing through the Agentic AI Engineering Program (SDA x WeCloudData), specializing in Generative AI, multi-agent systems, LLM applications, and RAG. Builds and evaluates production-grade AI pipelines using LangChain, OpenAI, and vector databases, backed by a strong software engineering foundation across backend, full-stack, and frontend development. Combines hands-on machine learning and deep learning expertise with proven skills in building scalable APIs and CI/CD pipelines to deliver intelligent, reliable solutions.

PROFESSIONAL EXPERIENCE

Backend & Structure Developer

Nov 2025 – May 2026

Rawiah · Part Time (Remote)

- Built and optimized RESTful APIs and conducted architecture reviews to ensure system maintainability, stable integration, and scalability.

Trainee – IT Operations

Feb 2025 – Mar 2026

Saudi Information Technology (SITE) · CO-OP | Tamheer

- **Solutions:** Developed full-stack features using React, Express.js, and Prisma, and implemented CI/CD pipelines via GitLab and Docker to accelerate product deployment.
- **Systems:** Automated Jira and Confluence environment setup using custom scripts, reducing manual configuration time and improving project documentation.
- **Help Desk:** Managed account provisioning for onboarding/offboarding and resolved technical requests to ensure smooth daily operations.

Application Developer

Aug 2025 – Feb 2026

Hotspot Fintech · Part Time (Remote)

- Developed high-performance mobile features using Angular, TypeScript, and Ionic/Capacitor, with rigorous API testing to improve application stability.

TECHNICAL SKILLS

Generative AI & LLMs: OpenAI API, Prompt Engineering, RAG, LangChain, LangGraph, Agentic AI, Fine-Tuning (PEFT), Transformers, BERT

LLM Evaluation: Ragas, LLM-as-Judge, Faithfulness, Hallucination Rate, Context Precision/Recall

Machine & Deep Learning: PyTorch, Neural Networks (ANN, CNN, RNN, LSTM), Supervised & Unsupervised Learning, MLflow, pandas, NumPy, multilingual-e5-large embeddings

Software Engineering: Python, TypeScript, SQL, FastAPI, Django, Flask, Node.js, Express.js, REST APIs, PyMuPDF, pytest

Frontend: React (TypeScript), Angular, Flutter, Ionic/Capacitor, HTML, CSS, Figma

Databases & DevOps: PostgreSQL, Prisma, Vector Databases (FAISS / Chroma), Docker, GitLab CI/CD, Git, Linux (RHEL)

PROJECTS

Modrik — Arabic-First Legal AI Assistant (RAG) — SDA Himmah Hackathon 2026

- Built a fully Arabic RAG assistant over Saudi Labor Law: FAISS vector search + locally-run multilingual-e5-large embeddings + streamed GPT-4o-mini answers citing exact article numbers across active/amended/repealed states.
- Engineered regex PII redaction (Saudi ID/IBAN), PyMuPDF PDF/text contract extraction, and pandas/openpyxl smart-chunked Arabic law ingestion.

Agriculture Knowledge Base — RAG vs Base LLM Benchmark — AI Engineering Capstone

- Owned the end-to-end evaluation framework: designed a dual-method harness (LLM-as-Judge across faithfulness/factual-correctness/similarity + heuristic exact-match MCQ) benchmarking 4 systems (Base LLM, General RAG, Product RAG Basic/Optimized) on golden question sets.
- Quantified retrieval impact and diagnosed failures — validated 20/20 golden-set retrieval, measured the optimization gain (product MCQ 60% to 73%, faithfulness 0.77 to 0.95), and traced residual errors to numeric value-extraction rather than retrieval.
- Curated and indexed agronomy references into a ChromaDB vector store (parsing, cleaning, chunking, OpenAI embeddings) feeding the General RAG baseline.

Blossom — AI Emotion Analysis Platform — Graduation Project

- Built an AI-powered emotion analysis platform (Huda Assistant) using the OpenAI API and advanced Prompt Engineering to analyze users' daily emotional states.

EDUCATION

Bachelor of Computer Science, Imam Mohammad Ibn Saud Islamic University

Jul 2025

Second-Class Honors — GPA 4.65 / 5.0

TRAINING & CERTIFICATIONS

Agentic AI Engineering Program — Saudi Digital Academy & WeCloudData

Aug 2026 – Oct 2026

Oracle Agentic AI Foundations Associate (1Z0-1157-26) — Oracle

Jun 2026

AI Engineering Bootcamp — Saudi Digital Academy & WeCloudData

May 2026 – Jun 2026

Building Agentic AI Systems — Saudi Data and AI Authority (SDAIA)

Apr 2026

Design Patterns in Software Development — Tuwaiq Academy

Apr 2026

Introduction to ITIL — Tuwaiq Academy

Feb 2026

LANGUAGES

Arabic — Native | English — Proficient
