

IBRAHEM. S. ALTOWALAH

AI & Agentic Engineer

+966557234199 ibrahem.su.t@gmail.com www.linkedin.com/in/ibrahem-altowalah github.com/ibrahem1957

ABOUT ME

Computer Science graduate specializing in Data Science, with hands-on experience in Generative AI, Large Language Models (LLMs) Machine Learning, and AI application development. Experienced in building practical AI-driven solutions and currently developing expertise in Agentic AI. Eager to contribute to innovative technology initiatives while continuing to grow in Artificial Intelligence and data-driven solutions.

EDUCATION

Bachelor of Science in Computer Science (Data Science) — with Honors | Majmaah University 2021 – 2026

Agentic AI Engineering | Saudi Digital Academy Aug 2026 – Present

- In-person intensive training focused on Agentic AI and the development of AI-powered solutions.

EXPERIENCE

AI Intern | Sequenive April 2026 – Present

- Built a privacy-first financial AI chatbot for querying and analyzing financial statements using LLMs and RAG.
- Optimized the solution to run with a lightweight 4B-parameter model for faster inference, local deployment, and enhanced privacy.
- Improved chatbot quality and task performance using QLoRA fine-tuning.
- Currently contributing to a new AI project focused on agricultural applications.

Teaching Assistant — AI & Agentic AI Bootcamps | Tuwaiq Academy April 2026 – Present

- Support participants in AI, LLM, and technical bootcamps through hands-on guidance during practical exercises and agent-building projects.

PROJECTS

WARF Meet — Local, Privacy-First AI Meeting Agent (Final Project) | Tuwaiq Academy | GitHub January 2026

- Built a fully local, privacy-preserving AI agent that automates the meeting lifecycle: transcribes speech, generates summaries, extracts decisions, and answers questions via contextual (RAG) search.
- Orchestrated the multi-step agent workflow (transcription → summarization → retrieval → access control) using n8n, with secure face-based authentication via OpenCV.
- Stack: Whisper, Gemma 3 (LLM), RAG, OpenCV, Ollama, n8n.

AgenticDoc — Multi-Agent RAG System | GitHub April 2026

- Built a Multi-Agent RAG system from scratch for document summarization, question generation, and context-grounded Q&A.

TRAINING

AI Model Building & Development Bootcamp | Tuwaiq Academy Nov 2025 – Jan 2026

- Data Science, Machine Learning, Deep Learning, and Sequence Models (RNN, LSTM).

Generative AI Bootcamp (LLaMA-based) | Tuwaiq Academy Jun 2025 – Jul 2025

- Generative AI, LLMs (LLaMA), Prompt Engineering, AI Agents, AI Application Development.

CO-OP — Predictive Modeling | Al Ammah for Communications & Information Technology Jun 2025 – Jul 2025

- Built predictive models (XGBoost, Random Forest) using Python to support decision-making.
- Processed and analyzed datasets to improve overall system performance and accuracy.

CERTIFICATES

- Data Science and Machine Learning Certificate using Python — Tuwaiq Academy
- Data Analysis Bootcamp using Power BI — Google Developer Groups

SKILLS

- Python
- LLMs
- Machine Learning
- Hugging Face
- RAG

SOFT SKILLS

- Self-Learning
- Problem Solving
- Leadership
- Time Management

LANGUAGES

- Arabic
- English
